Job Description form

***Note:** This JD does not form part of the employment contract but is rather provided for guidance. The precise duties and responsibilities of any job may be expected to change over time. Job holders will be consulted over any proposed changes to this JD before implementation.*

<u>Name of the Candidate:</u> -	<u>Job Type:</u> Full time employment
<u>Job Title:</u> Full Stack Developer (FSD)	<u>Division/Department:</u> Development team - Bigapps.
<u>Reporting To:</u> IT - Project Coordinator	<u>Age Criteria:</u> -
<u>Gender Preference:</u> -	<u>Location:</u> Maduravoyal, Chennai.
<u>Date of writing/updating JD:</u> 02/02/2021	

Purpose:

We are looking for a dynamic and potential full stack developer (FSD) who is a web developer or engineer and can work with both the front and back ends of a website or application for our team at **Bigapps (A subdivision of Bigfix Gadget Care LLP)**. In this sense, they provide an end-to-end service, and can be involved in projects that involve databases and building user-facing websites. Their role can extend to working with clients during the planning phase of projects.

For large or specialized projects, often the Full Stack Developer may involve others to write specialized code - although importantly, the Full Stack Developer must be familiar with and highly skilled in most aspects of web and application development.

For more information about the organization, visit www.bigapps.in.

Main Responsibilities:

- Developing front end website architecture.
- Designing user interactions on web pages.
- Developing back end website applications.
- Creating servers and databases for functionality.
- Ensuring cross-platform optimization for mobile phones.
- Ensuring responsiveness of applications.
- Ability to reverse engineer bugs and identify problem areas.
- Working alongside graphic designers for web design features.
- Seeing through a project from conception to finished product.
- Designing and developing APIs.
- Meeting both technical and consumer needs.
- Staying abreast of developments in web applications and programming languages.
- Strong organization and project management skills.

Qualifications:

Educational Qualification: Min requirement of an Undergrad degree

Relevant Experience: 0-1 year of experience.

Personal Traits: Excellent personality. The candidate should be a go-getter. Should be willing to learn new technologies and adapt to new concepts as soon as possible. Should be confident in brainstorming ideas and strategizing. Excellent Communication & presentation skills. Diplomatic in nature. Mobility & self drive.

Languages: English (Read, Write, Speak)

Skills Required: Python, Django, Bootstrap, HTML, CSS, JS, Angular, React.js, Node.js, Restful API, MySQL, MongoDB, Firebase, GCP and AWS.

Our Websites:

- www.bigfix.in - Aftersales support for electronic devices.
- 4biz.bigfix.in - Managed service support for Insure-tech companies and OEMs.
- partner.bigfix.in - Lead management and execution portal for repair centers/technicians.
- goto.bigfix.in - D2C hyperlocal market for repair and maintenance of electronic devices.
- sell.bigfix.in - Sell your gadgets for the best price.
- www.bigapps.in - Software and web development division of Bigfix Gadget care LLP.

What does the candidate gain?:

- The candidate will get to work in a start-up environment.
- As any startup, we are fluid with our responsibilities and he/she will be handed multiple opportunities in different domains to enhance their knowledge database in various areas and assist them in finding a strong ground.
- A close knit employee community, ensuring personal attention towards your career development.
- 6 Work days a week.
